Humana

Humana Healthy Horizons: Louisiana Medicaid

Community Resource Guide

Childhood obesity

According to the Centers for Disease Control and Prevention (CDC), childhood obesity is a serious problem in the U.S. and puts children and adolescents at risk for poor health.¹

Behavior

Behaviors that influence excess weight gain include:

- Eating high-calorie, low-nutrient foods and beverages
- Taking medicine
- Not getting enough physical activity
- Having trouble sleeping
- Spending too much time watching television or other screen devices

To help children grow and maintain a healthy weight, the CDC recommends:

- Consuming healthy foods
- Being physically active

Health risks²

- Children who have obesity are more likely to have:
- Breathing problems, such as asthma and sleep apnea

- Fatty liver disease, gallstones, and gastro-esophageal reflux (e.g., heartburn)
- High blood pressure and high cholesterol, which are risk factors for cardiovascular disease
- Increased risk of impaired glucose tolerance, insulin resistance, and type 2 diabetes
- Joint problems and musculoskeletal discomfort
- Low self-esteem and lower self-reported quality of life
- Psychological problems such as anxiety and depression
- Social problems such as bullying and stigma

Programs Offered

- **MyHumana Go365 program**—earn rewards for healthy activities
- **YMCA gym membership**
- **KidsHealth consumer video library**
- **Child Wellness visits: Early and Periodic Screening, Diagnostic and Treatment**
- **Bariatric surgery for age 18 and up**
